Cell Phone Usage Policy

To maintain a professional and distraction-free learning environment, students are strictly prohibited from using cell phones during classroom instruction. Personal phone calls, texting, social media use, or any other non-academic activity is not permitted while class is in session.

However, instructors may authorize the use of cell phones for educational or research purposes directly related to the lesson being taught. Such use must occur only under instructor supervision and solely for instructional needs.

Students who violate this policy may receive a warning, and repeated violations may result in disciplinary action as outlined in the school's Code of Conduct. AVI Career Training encourages all students to demonstrate professionalism and respect toward their instructors and classmates by minimizing distractions and focusing on learning.
